

Green Earth Project To Promote & Protect Environment

"Save Future By Planting a Tree"

Our primary concern is to conserve the country's natural resources, including lakes, rivers, forest, trees and ensuring prevention and abatement of pollution.

Our objectives are Prevention and control of pollution, a forestation and regeneration of degraded areas and Protection of the environment .Forest are renewable resource and contribute substantially to economic development .They play a major role in enhancing the quality of environment

We are working on to achieve the following tasks to protect and safe our environment:

- To promote environmental awareness among all section of society
- To spread environment education especially in non-formal system.
- To promote environment education through existing education institution.
- Encourage NGO, media, community and other concerned organization for promoting awareness about environmental issue among the people at all levels.
- To mobilize peoples participation for preservation and conservation of environment.
- Encourage people to plant a tree in there locality.
- We encourage people to use recycled paper.
- We teach Children who are living in construction areas and unauthorized colonies how to make Recycle papers and its Uses and they can also make their livelihood by selling them into the markets.
