

Water Sanitation Hygiene & Girl Education Project

"It's Our Fundamental Right To Have Safe Drinking Water & Sanitation"

10 July 2015

The most precious thing in the world known to Mankind is Water without water there is no life, no human being. Safe Drinking water and sanitation are one of the two upmost needs of the Human Beings.

Unsafe drinking water and Sanitation facilities can lead to deadly disease which can severely affect the community and can have dreaded effects on their offspring.

India is the open defecation capital of the world where 638 million are defecating in the Open over 50 % of the population. 66 % Girl Schools don't have functioning girl toilets in India. Around 23 % Girls drop out of school every year in India due to lack of menstrual hygiene affecting the Girl Education Badly. Around 53% of Children in Age Group of 5-14 Do Not Wash their Hands after defecating. Every day 1000 children dies in India due to Diarrhea and other water borne diseases Diarrhea kills more children in India then Aids , Malaria and Measles Combined .

To minimize these issues, and making Women, Girl Child, Families and Community more aware Sanitation facilities in schools & communities, Menstrual and Personal Hygiene, methods of obtaining Safe Drinking Water, improve Water Supplies, and to promote Safe Hygiene Practice we started "***Water Sanitation Hygiene & Girl Education Awareness Project***" Project. It's a pilot project of our organization which we are implementing in Uttar Pradesh Delhi NCR Region, Himachal Pradesh, Leh and Rajasthan.

We are a research based organization which is implementing the above said project through a three tier model which is actively used to provide Sanitation, Water & Hygiene Sustainable and Aware Society.
